PROFESSIONAL SUMMARY

Versatile Computer Engineering undergraduate with a comprehensive foundation spanning Artificial Intelligence, Cloud Infrastructure, Network Security, and Embedded Systems. Proven ability to bridge hardware and software through hands-on experience in full-stack development, machine learning model deployment, and secure CI/CD pipeline automation. Highly adaptable problem-solver with a strong grasp of system architecture, eager to leverage a multidisciplinary technical skill set to drive innovative engineering solutions.

EDUCATION

BSc Engineering (Computer Engineering)

University of Ruhuna, Sri Lanka

2023 – 2027

GPA: 3.43 / 4.00

Diploma in English Language and Literature

Aquinas College of Higher Studies, Sri Lanka

June 2024

Relevant Coursework: Machine Learning, Software Engineering, Data Structures & Algorithms, Computer Networks, Operating Systems.

TECHNICAL COMPETENCIES

Programming Languages: Python, C++, Java, JavaScript, TypeScript, Verilog HDL

AI & Machine Learning: Machine Learning, Scikit-learn, Pandas, NumPy, OpenCV, YOLO

Software Development: Full-Stack Development, REST APIs, Database Management, Git/GitHub

Systems & Networking: Linux, TCP/IP, Socket Programming, Digital Logic Design

COMPREHENSIVE ENGINEERING PROJECTS

Vision-Based Vehicle Speed Estimation | AI & Computer Vision 🧠

2026

- Developed a computer vision system to detect, track, and estimate vehicle speeds from video streams.
- Applied **YOLO-based object detection, OpenCV, and tracking algorithms** for intelligent traffic monitoring applications.

Smart Nutrition Intelligence System (SNIS) | AI & Healthcare 🧠

2026

- Built an intelligent nutrition platform providing personalized dietary recommendations and nutritional insights.
- Applied data-driven approaches to support nutrition planning and intelligent healthcare decision-making.

Concrete Strength Prediction | Machine Learning 🧠

2026

- Developed a machine learning model to predict concrete compressive strength using material composition parameters.
- Performed data preprocessing, feature analysis, and predictive modelling using Python-based ML libraries.

Bike Race Network | Networking & Community Platform 🧠

2026

- Developed a digital platform connecting cycling enthusiasts, race organizers, and participants through event management features.
- Designed application workflows to support user interaction, event organization, and community engagement.

Job Searching App | Full-Stack Recruitment Platform 🧠

2025

- Developed a job discovery platform enabling users to search opportunities and manage recruitment activities.
- Implemented user management, job listing workflows, and structured application handling.

EXTRACURRICULARS & COMMUNICATION

Vice-Captain, Karate Team | Faculty of Engineering, Ruhuna

2024 – 2025

Member | IESL & IEEE Student Branches

Active

Core Engineering Competencies:

System Architecture

Machine Learning

Infrastructure as Code

Network Security

Agile Dev
