PROFESSIONAL SUMMARY

Computer Engineering undergraduate specializing in software engineering with hands-on experience in full-stack application development, database-driven systems, and scalable software solutions. Skilled in designing user-focused applications, implementing backend logic, and developing real-world systems across healthcare, recruitment, finance, and business domains. Passionate about building reliable, efficient, and maintainable software solutions.

EDUCATION

BSc Engineering (Computer Engineering)

University of Ruhuna, Sri Lanka

2023 – 2027

GPA: 3.43 / 4.00

Diploma in English Language and Literature

Aquinas College of Higher Studies, Sri Lanka

June 2024

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Computer Networks.

TECHNICAL COMPETENCIES

Programming Languages: Python, C++, Java, JavaScript, TypeScript

Software Development: Full-Stack Development, REST APIs, Object-Oriented Programming, Database Management

Frontend Technologies: HTML, CSS, JavaScript, TypeScript, Modern UI Development

Backend & Tools: Git, GitHub, Linux, SQL, Software Design Principles

SOFTWARE ENGINEERING PROJECTS

Job Searching App | Full-Stack Recruitment Platform

- Developed a recruitment platform enabling users to search job opportunities and manage applications.
- Implemented user management, job listings, and structured recruitment workflows.

SL Traffic Fine Management System | Full-Stack Application

- Built a digital system for managing traffic violations, fine records, and administrative processes.
- Designed database-driven workflows to improve efficiency and reduce manual record handling.

KidneyLink Healthcare Platform | Healthcare Software System

- Developed a healthcare management platform connecting patients, donors, and healthcare services.
- Implemented digital workflows for patient information management and healthcare coordination.

MoneyManager | Financial Management Application

- Created a personal finance application for managing income, expenses, and financial records.
- Applied software engineering principles for structured data handling and user-friendly interaction.

Online Salon Booking System | Business Management Application

- Developed an online appointment management system enabling customers to book salon services efficiently.
- Implemented service management, scheduling workflows, and customer booking operations.

Daily Task Manager | Productivity Application

- Built a task management application for organizing daily activities and tracking completion progress.
- Implemented CRUD operations and user-focused productivity features.

Contact App | Application Development

- Developed a contact management application for storing, organizing, and retrieving user information.
- Implemented efficient data management and search functionality.

Bike Race Network | Networking & Community Platform

- Developed a digital platform connecting cycling enthusiasts, race organizers, and participants.
- Designed application workflows supporting user interaction, event management, and community engagement.

EXTRACURRICULARS & COMMUNICATION

Vice-Captain, Karate Team | Faculty of Engineering, Ruhuna

Member | IESL & IEEE Student Branches

2024 – 2025

Active

Core Engineering Competencies:

Software Architecture

Full-Stack Development

Database Design

Agile Development

Problem Solving
